Continuation of 5. does NOT place the application in condition for allowance because: a) the 35 USC 112, 102, and 103 rejections are maintained for reasons of record in the Office Action mailed 8/27/02, Paper No. 24: b) Applicant's arguments over the 112 and 102 rejections are moot, as the arguments are directed to the After Final Amendment that is not being entered; c) Regarding the 103 rejection, Applicant argues, "EP '661 does not teach or suggest that the silicones disclosed therein could be substituted with an alpha, omegasubstituted oxyalkylenated silicones. . .In fact, EP '661 teaches away from such a substitution when it states that it is 'very difficult to obtain a highly stable water-in-oil type emulsion cosmetic which comprises a silicone oil as a base". This argument is not persuasive. EP '615 teaches the oxyalkenated silicones as having superior properties, such as reheological flow behavior and as forming a lamellar phase strucutre to maintain the suspension of water-insoluble particles. Furthermore, it is respectfully pointed out that the test for obviousness is not whether the features of one reference may be bodily incoporated into the other to produce the claimed subject matter but simply what the combination of references makes obvious to one of ordinary skill in the pertinent art. Applicant argues, "One of ordinary skill in the art would not have been motivated to substitute elements of these compositions, intended for two different and completely incompatible uses". This argument is not persuasive. The Examiner respectfully points out that both prior art references are directed to cosmetic products comprising oxyalkenated silicones. Thus, one of skill in the art would be motivated to look to references teaching other oxyalkenated silicones with superior cosmetic properties to substitute for those in the primary reference.
